

## Web Developer Job Descriptions (Junior, Mid-Level, Senior)

While web development job descriptions can vary across companies, most will share some core responsibilities that evolve based on experience level. Here's a breakdown of the key duties for Junior, Mid-Level, and Senior Web.

### Junior Web Developer

- **Responsibilities:**

- Collaborate with senior developers to build and maintain website features.
- Write clean, well-documented code using HTML, CSS, and JavaScript.
- Assist with testing and debugging existing website functionality.
- Stay up-to-date on the latest web development trends and technologies.

- **Qualifications:**

- Bachelor's degree in Computer Science, Information Technology, or a related field (or equivalent experience).
- Strong understanding of HTML, CSS, and JavaScript fundamentals.
- Basic understanding of web development frameworks (e.g., Bootstrap) a plus.
- Excellent communication and collaboration skills.
- Eager to learn and adapt to new technologies.

### Mid-Level Web Developer

- **Responsibilities:**

- Independently design, develop, and implement website features.

- Work closely with designers and project managers to translate design mockups into functional code.
- Optimize website performance and troubleshoot complex issues.
- Experience with version control systems (e.g., Git).
- Mentor junior developers.
- **Qualifications:**
  - Bachelor's degree in Computer Science, Information Technology, or a related field (or equivalent experience)(Optional).
  - 2-3 years of professional web development experience.
  - Proficient in HTML, CSS, and JavaScript (including frameworks like React or Angular).
  - Experience with server-side scripting (e.g., PHP, Python) a plus.
  - Strong understanding of web accessibility best practices.
  - Excellent problem-solving and analytical skills.

## **Senior Web Developer**

- **Responsibilities:**
  - Lead the development process for complex web applications.
  - Architect scalable and maintainable web solutions.
  - Stay ahead of the curve on emerging web development technologies.
  - Manage and mentor a team of web developers.
  - Contribute to the overall technical vision and direction of the company.
- **Qualifications:**

- Bachelor's degree in Computer Science, Information Technology, or a related field (or equivalent experience).
- 5+ years of professional web development experience.
- Extensive experience with various web development technologies (front-end and back-end).
- Experience with building APIs and working with databases.
- Strong leadership and communication skills.
- Proven ability to deliver projects on time and within budget.
